DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 10 are indefinite because it does not state when the alternating current pulse is superimposed "with a second current pulse of the same polarity" and thus the actual functioning of the device is indeterminable. Further it is unclear whether this "second" current pulse is superimposed on top of the "current pulse" (which preferably would be denoted as a first current pulse) or superimposed at some later time.

The use of reference numerals within the claims tend to obscure the intended claim limitations, especially in the dependent claims. These references can be given no weight because it is improper to read the claims with reference to the drawings. The claims should be redrafted to set forth the timing of the current pulses with respect to the square wave alternating current and the current pulses differentiated by the use of first, second, third, etc.

Claims 2-7 , 9-10 are indefinite because the numerals contained within the parentheses do not correspond to those used with respect to "the current pulse" in Claim 1. It seems that the limitations in these claims are intended to refer to the second

current pulse or some later pulse. Again, reference to the pulses as first, second, third, etc. along with the timing of the pulse would help alleviate these deficiencies.
